

Every week..

- Reading every day for 20 minutes
- Hand writing practise - paper copy distributed weekly
- Maths consolidation - set weekly on MyMaths

Extra work to do over the half term..

Science

This half term we are exploring our solar system. Can you design your own planet? Draw your own planet and make sure to give it a name. Please write some facts about your planet and explain how it differs from Earth. Use your imagination, does gravity work differently and everything upside down? Or perhaps dogs own human pets?!

R.E.

Research a creation story; it may be from your own religion or one that interests you. Create a story map, with images and captions, to retell the key events in the story.

Geography

Produce a poster about a famous river. You should include where it's located, some images as well as interesting facts. Try to use some terminology from our geography lessons, e.g. ox bow lake, mouth, estuary.

Art

Can you create your own Aztec mask? Perhaps try use techniques you have previously learnt about, such as mosaics or blending.

Music

We have now started our African drumming lessons on a Tuesday! Research a new musical instrument from a different country. How is it played? What noise does it make? How is it made? What region is it from?

P.S.H.C.E.

This half term we are talking about dreams and aspirations. Talk to someone in your house about what they wished to be as they grew up. How does their interests differ to yours? Does their current career match their plans?

Once you have completed any of these activities, send it to your teacher on Google Classroom or bring it in to show them and the rest of your class. Tasks due in no later than

Tuesday 24th February 2026.

Merits may be awarded for excellent effort.
