Extra work to do over the half term...

Science

Create a family tree complete with pictures. Label it to show the kind of inherited features are evident within your family. These could be physical or character traits.

History

Create a storyboard of the Montgomery Bus Boycott. Include what Rosa Parks initially did all the way up to when the bus drivers went back to work.

Geography & Maths

Draw a graph showing how the population of the UK has changed since the 1800s. You will need to do some research online to find out specific numbers. Think about the best graph to use.

Art

Carry out some research into Banksy.

Who is the man/woman behind the mask?

Computing

In groups of 3 or 4, create a presentation on anything you want. The only catch is that you have to collaborate using Google Classroom, just like we did last term. There may be extra teamwork merits up for grabs.

RE

Think about someone who inspires you. This person could be famous or someone you know. Write a fact file about them, including a description about why they are inspiring.

Once you have completed any of these activities, send it to your teacher on Google Classroom or bring it in to show them and the rest of your class. Merits may be awarded for excellent effort.
