

Every week..

- Reading every day for 20 minutes
- Hand writing practise - paper copy distributed weekly
- Maths consolidation - set weekly on MyMaths

English

Make an acrostic poem for one of the planets in our solar system.

Sixth planet from the sun,

Atlas is one of its moons

Maths

Can you create some word problems for yourself to solve based on our topic of ancient Greece? Here is one for you to try yourself..

Adonis has 12 ships; each ship has 96 soldiers, how many soldiers can travel in Adonis' army?

Geography

Choose a famous Greek landmark or city. Create a 3D model of your scene. Be creative as you can, for example the Parthenon.

Art

Can you use different materials to create a wind chime or a dream catcher? Perhaps use string, beads, feathers, paper etc.

R.E

Although we all have different religions, lots of our fundamental beliefs are similar. Draw around your hand, on each finger, can you write a prayer or a wish? For example, I hope that we can find a cure for world hunger.

P.E.

Create your own circuit that you complete 2-3 minutes at a time before moving to the next activity. Perhaps this could include skipping or running drills. Write down your circuit plan for others to follow, or ask your parents to upload a video of you completing an activity to google classroom!

Tuesday 3rd June 2025.

Merits may be awarded for excellent effort.
